DX INFORMATION EXCHANGE 147.18 0130Z WEDNESDAYS

*** GALA DINNER MEETING ***

Arrangements are complete for Ur CDXA to be the first DX Club to present the latest Clipperton DXpedition slides(except for the one presentation by W6OAT). We can thank the NCDXF for making them available.

They had many slides to edit to make sure the best ones were included along with an audio tape to give information on each. When you have that many operators taking photos and a chance to pick thru them, you come up with a great show. We have a few slides from the A35 operation by ZLIAMO via NCDXF also.

When you combine the presentation and the meal, you are in for an enjoyable evening.

Due to circumstances beyond our control, the past meeting place is no longer available. But we do have a new one just as nice and the food is great. Pse note the information and directions.

Place: FISHFARE OCT 12

Location: Westinghouse Blvd & Nationsford Road, Charlotte, NC

Time: 8:15 PM (not before)

Order Ur meal 8:30 PM

Slide show: 9:30 PM (app 1 hour)

BYOB

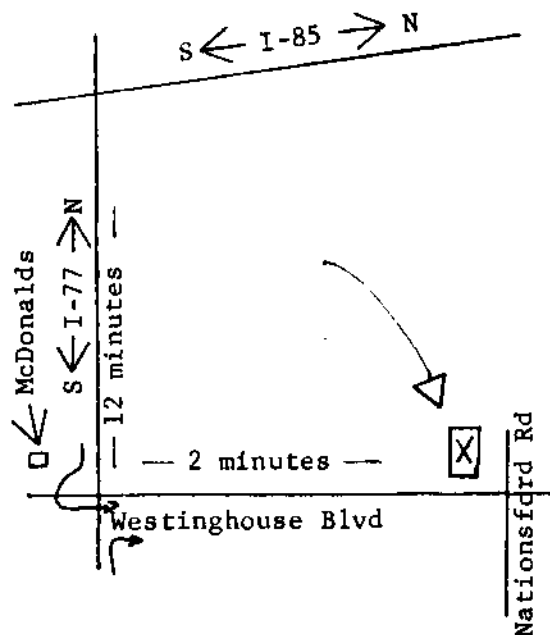

(only 30 minutes from order to food)

The Fishfare serves seafood & steaks and each member will order from the menu and pay as U leave. No salad bar but there is a good one on the menu. If U BYOB, U may order ur own setup for \$1:00/person. No arrangements have been made for a group type order as we have had in the past but maybe so in the future. This time you take care of your meal.

If any of you suffered ill effects from the Bar B Q, both cooks will be present at

this dinner (Ted & Robert) if you need to see them.

Here is the map and its really easy to find it...

Have you been planning to help the CDXA but could never think of how? NOW is ur chance to do something. Invite a non-member amateur to the dinner and provide information as to the location or better yet, meet him and come together. Remember that friendship and helping others is our goal. Make sure all visitors are introduced to the other members. You never know who would like to attend until you ask.

1985 CQWW forms enclosed in this issue, contact KD4RH or N4ZC for instructions.

QSL AND DX INFORMATION

The Uruguay DX Group will reactivate the Uruguayan prefix "CV". To that effect they have decided to operate from the "ISLA DE FLORES" on 6,7 & 8th of Dec 85.

They expect to be on the air by 2100Z on the 6th. The Prefectura Nacional Naval (Uruguayan Coast Guard), which is part of the Navy, will provide transportation for all equipment and operators.

The call for this occasion will be CV0U. Anyone may receive an award for 3 contacts on 3 different bands, any mode.

The operators will be CXs 1AL, 1BBL, 2CS, 3BJ, 4CR, 5AO, 7AD, 8CG, 8CF, 8BZ, and 9BBM. With those operators and 2 tons of equipment, contacts from 160 to 2 mtrs will be possible.

The history of Isla De Flores and it's lighthouse is very interesting and if we can obtain photos and more information, we can have a good story.

All QSLs, awards and additional information is via CX2CS P O BOX 20063, Montevideo, Uruguay.

SAO TOME & PRINCIPE

It appears Luis, S92LB is filling the need for the deserving a bit faster since he has gained some experience. I have noticed from comments that when he comes up alone, more stations are worked, has less confusion, than when on a net. Even the cat calls are less now. He has proven his intentions to do his best with what he has and if given enough time, he will take the top edge off the need for S92. I admit I get confused a bit lately but how about this.... Luis wrote a letter to me and gave in detail the equipment he could possibly use, but added a PS "can't receive any equipment now, don't ship". Luis is doing more now for the majority than anyone has lately.

A PS7 has permission to go himself and OH2BH is willing go along and pay his own way, but the Brazilian has no financial backing to cover the high cost. He did however arrange for a visa for Martti. Its now a waiting game.

If the Brazilian/Martti doesn't work, hang on until the latter part of October. More than one group from other countries are trying to make it. One group is doing very well and if Murphy's Law doesn't strike, they will make a loud noise shortly. Beam heading, 92°

A table full of 2 Mtr gear for the CQ VHF prefix contest. The large piece of equipment in the middle of the table is a Henry KW. WA4VCC and WB4TLX were operating at the time this picture was taken. The station was located in the living room of K4LVV's mountain-home.

A new 2 Mtr, 19 Element Yagi going up on a new 60' tower at the mountain home of CDXA member K4LVV. Joe's mountain is 4200' with a beautiful 360 degree view. On the tower is WD4ABZ and CDXA member Ken Boyd (WA4UNZ). This is one of two, 2 Mtr arrays used in the 1st Annual CQ VHF Prefix contest in July.
